

ABS Consulting's LEADER software is powerful, versatile, and easy to use. HazardReview LEADER™ and RootCause LEADER™ is designed to effectively manage risk. These packages may be licensed directly to a company or individual, or purchased through ABS Consulting training courses.

HazardReview **LEADER™** 2009

HazardReview LEADER

The 2009 version of HazardReview LEADER is the most flexible and efficient PHA software available. It integrates HAZOP, What-if, Checklist, FMEA, LOPA, and other tools into a comprehensive program with superior navigation, linking, action item management, and data mining features not available in word processor- or spreadsheet-based solutions. Now complete with foreign languages templates and new type-ahead features.

HazardReview LEADER is designed for in-the-meeting use.

- LEADER ShortHand™ reduces typing and allows more consistent worded entries that offer improved auditability
- LEADER Links™ create two-way, cause-effect relationships between related items - an essential tool in preparation for layer of protection analysis (LOPA)
- Newly expanded LEADER Library™ encapsulates decades of hazard analysis experience
- AutoSearch picklists™ and AutoNumbering eliminate the need to copy, renumber, and rewrite items that apply to multiple issues/scenarios

RootCause **LEADER™**

RootCause LEADER

Based on ABS Consulting's Root Cause Map™ and related training course, this easy-to-use incident investigation and reporting database program allows users to quickly record the root causes of any type of incident, accident, near miss, reliability problem, quality impact, or business loss event.

With RootCause LEADER software, users can:

- Perform data trending and analysis
- Generate completed incident investigation report forms directly from the software
- Add a detailed background/description for each causal factor and root cause
- Investigate and track any type of incident, event or mishap
